Man Shot up to 28 Times with Taser by Australian Police

'Police in Australia are to review how they use Taser guns after the death of a man in Queensland who was stunned possibly as much as 28 times by one of the powerful electronic weapons. Antonio Galeano, 39, an amphetamines addict, collapsed and died 15 minutes after being stunned by a 50,000-volt Taser gun during a confrontation with police in Brandon, near Townsville in far north Queensland last Friday.

Police said initially that he had been shot three times, but data recorded on the Taser gun has shown that it was triggered 28 times. It is unknown if Mr Galeano was hit by all of the electric shock bursts.'
