### Whistleblower On Original Aspartame Toxicity Studies

'Dr Bowen relates: "I was one of only two independent scientists, who ever read the original aspartame toxicity studies from FDA files. They were done at only 1/1000th the legally requisite dose. In that minuscule dosage the rat brain cancer was the worst ever caused by any chemical ever tested at any dosage! When they marketed aspartame for soft drinks in 1983, the next six months saw a 10% jump in the US brain tumor rate, and also a 30% jump in the incidence of new cases of diabetes.'
